Job Application for Software Developer position

Dear Sir/Madam,

Why MANTECH?

I am submitting my resume for consideration for the Software Developer position. I am very interested in being a part of this team, and I feel that I would be a great addition.

In August, I graduated with honors from the University of Guelph with a Bachelor of Computing, majoring in Software Engineering. As noted in your job posting, working at MANTECH would help me better understand the industry and further develop my skills, experiences, and relationships.

Why Me?

My past and current experiences include OOP, algorithms and data structures, software, and application design/development, where I gained significant experience using multiple languages such as C, Java, JavaScript, HTML5, CSS, and Flutter. In addition, I am familiar with the frameworks/platforms React, IOS, Android, and the MySQL and NOSQL databases. My experience also included following specified requirements, testing my solutions to ensure they met them, and documenting my designs and solutions. Several assignments required modifying my code in a previous project, which helped reinforce good code design to enable refactoring.

Augmenting my computing degree with a minor in Business ensured that I am proficient working in an Agile environment and adept with utilizing all the Microsoft Office Applications (including Excel, Powerpoint, and Word).

My customer service-oriented work experience has taught me the importance of thinking like a customer and building a convenient and memorable customer experience that aligns with the brand. It has also helped me grow my skills in team collaboration, verbal communication, and project leadership.

On my portfolio website, you can find more information on the skills and qualifications I would bring to the MANTECH table.

Final Words

Thank you for your consideration and time. I am eager to learn more about the position and MANTECH.

Sincerely,

Conner Armour
