Programming Python, C, Java, Node.JS, JavaScript, LaTeX, SQL, Firebase, Ruby, Flutter

Web Express with Node.JS, HTML5, Bootstrap, CSS, React

Personal Skills Problem solving, Critical thinking, Ideation, Team building, Customer orientation, Active learning and listening, Persuasion

Projects

BattleBoat.JS

JAVASCRIPT, NODE.JS, HTML, CSS, FIREBASE, EXPRESS

- An update to an existing JavaScript and CSS version of the popular board game Battleship where a player would face off against an AI. The updated version of the game included various improvements and additional features. New functionality included account sign-up and login with Firebase backend that held user information and player performance statistics, allowing for ship rearranging after placement before the game starts, and a new headquarters game mode (a 1x1 square is randomly placed on the grid and causes instant loss if hit)

GPX Viewer/Editor Web-App

C, JAVASCRIPT, NODE.JS, MYSQL, HTML, CSS, BOOTSTRAP

- A web app that lets users view and modify GPX files (a file format that stores GPS data). The app allows users to upload a GPX file, view the data, and edit the data by adding, removing, or moving points. The app also allows users to download the modified GPX file.

Rogue Game

JAVA

- A simple game written in Java that allows players to move around room to room and collect various items. Includes UI to display the game screen, inventory, the players name and name changing field.

Experience

PepsiCo.

MERCHANDISER

- Responsible for product merchandising within large volume stores. Built customer relationships at store level.

Kitchener, ON

May. 2021 - Aug. 2022
